

High Capacity Barrel Diffuser Building Product Information Sheet

Version 1.1 – Issued 20/09/24

Product

Product name	High Capacity Barrel Diffuser
Product type	Diffuser
Product Identifiers	BHC

Product description and intended use

- The High Capacity Barrel Diffuser is designed for applications that require long throws and large volumes of air movement. Some examples include large retail outlets, gyms, or factories.
- These diffusers are available in either anodized, mill or powder coat finishes.
- The two available sizes are 635W x 300H and 1270W x 300H
- The throw can be adjusted automatically by either use of an actuator or thermal power pill.
- Actuators are available in either 24V or 230V configurations.
- The thermal pill does not require any electrical connection.

Relevant NZBC clauses

- Clause B2 Durability: Performance B2.3.1 (c) 5 Years
- Clause H1 Energy Efficiency: Performance H1.3.6

Contributions to compliance with NZBC

- **B2:** The lifespan of the BHC will vary based on the environment it is installed in. For a standard HVAC installation, the BHC would provide a durability of a minimum of 5 years. Excessively corrosive or harmful environments or exposure to fire, heat or water will reduce the lifespan of the BHC.
- **H1:** When installed in a commercial building as a supply diffuser the BHC must be designed to have a maximum pressure drop of 40Pa.
- **H1:** When installed in a commercial building as an exhaust grille the BHC must be designed to have a maximum pressure drop of 30Pa.

Relevant standards

- N/A

Conditions and limitations of use

- The BHC should be specified by a suitably qualified engineer.
- The BHC should be installed by a suitably qualified and trained tradesperson.

Warnings and bans

The BHC is **not** subject to a warning or ban under section 26 of the Building Act 2004.

Installation details and product datasheet
